SKILLS

- ◇ Java
- ◇ PHP
- ◇ MySQL
- ◇ C# and .NET
- ◇ C++
- ◇ Android
- ◇ XML and DTD
- ◇ Python
- ◇ CSS
- ◇ MongoDB
- ◇ Bootstrap
- ◇ wireframes

BEST BUY

August 2013 - Present

Customer level of the geek squad. Including troubleshooting, shipping, receiving, repair, functionality checks, and others.

Previously worked as a Sony camera specialist—training (clients and coworkers), sales, and merchandising (display and signage). Before this, I set up displays at various stores in the district. This required following directions, filing, emails, phone conferences, blog communication, and unboxing cool new things.

I started at Best Buy in the “connected” department. I was required to know all things mobile, computers, tablets, home automation, and networking. Custom fitting products to client’s lifestyles.

SALT LAKE COMMUNITY COLLEGE

July 2012 – July 2013

As an audio/ visual technician I worked closely with the faculty for classroom technology help. A typical day would involve troubleshooting faulty equipment, training staff and faculty, delivering temporary set-ups, running production equipment(special events and broadcast classes), or accommodation for disabilities.

FRANKLIN UNIVERSITY

December 2018

Currently attending to complete a Bachelor’s in Computer Science (software development). Coursework has covered various computer languages, web design, professionalism, networking, technical communication, and math.
